

Holding Back the Flood

Objectives:

- Consider the challenges of climate change linked to fluvial flooding
- Explore how we can protect homes, communities and the environment from the impacts of flood
- Investigate natural flood management strategies

Summary:

This session looks at how climate change is increasing the risk of flooding and we can manage this risk, using both man-made structures and natural flood management.

Follow up activity:

Check out your home and school address on the flood warning service. You can find out:

- The long-term flood risk for an area in England
- The possible causes of flooding
- How to manage flood risk
